HANDS-ON EXPERIENCE

Hands-on Experience in Development Environments

IBM

Present Remote

SAPiens Project

- Access Control (AC): Configured system parameters, provisioning types, and password policies.
- Access Control (AC): Configured system parameters, provisioning types, and password policies.
- Access Risk Analysis (ARA): Created and maintained rulesets, conducted automated analysis of SoD (Segregation of Duties) conflicts, evaluated risk levels (Critical/High/Medium/Low), and generated comprehensive risk reports.
- Access Request Management (ARM): Configured access approval workflows via BRF+, managed access requests, and validated routing workflows.
- Business Role Management (BRM): Created and maintained business roles, mapped them to SAP technical roles, and defined acceptable risk thresholds.
- Emergency Access Management (EAM/Firefighter): Set up Firefighter IDs, configured ID assignments, managed temporary emergency access, and performed detailed log reviews.
- Risk Management (RM): Developed organizational structures, documented risks, evaluated them utilizing a Probability vs. Impact matrix, and assigned mitigating controls.
- Integration & Base Configuration: Configured RFC connectors (Integration Framework), executed role synchronization (GRAC_ROLE_SYNC), validated satellite system connections, and analyzed integration logs.

ABOUT

I am an SAP Security and GRC professional with over a decade of experience securing enterprise landscapes and navigating complex system architectures. My journey in technology was built from the ground up—transitioning from hands-on IT infrastructure support to SAP Security through determination, self-study, and a relentless drive to master access governance. This foundational experience gave me a unique, holistic perspective, allowing me to bridge the gap between technical execution, end-user needs, and corporate compliance.
Today, my focus lies in large-scale SAP S/4HANA migrations, global rollouts, and SAP GRC administration (Access Control, ARA, ARM, BRM, EAM/Firefighter). I am deeply committed to optimizing access management processes and executing efficient role restructuring, ensuring strict adherence to least privilege policies and Segregation of Duties (SoD).
Currently acting as a key contributor in complex S/4HANA upgrades, I thrive in environments that demand strategic problem-solving and technical vigilance. Always focused on continuous improvement and operational stability, I am driven by the challenge of maintaining secure and resilient SAP environments."

EXPERIENCE

Senior SAP Security Consultant

11/2024 - Present

IBM

São Paulo, Brazil (Remote)

Project SAPiens: Currently serving as a key contributor to the CPFL Energia system migration from SAP ECC to S/4HANA, encompassing the upgrade of satellite systems (CCS, CRM), implementation of new BW systems, and the migration to embedded SAP GRC.

Consulting: Assurance

- Analyzing, adjusting, and aligning roles, authorization profiles, and authorization objects to ensure a seamless transition from legacy systems to S/4HANA.
- Executing SU24/SU25 upgrade steps to identify functional impacts and effectively resolve post-migration authorization gaps.
- Administering SAP Fiori Launchpad environments to support the new S/4HANA architecture.
- Creating and maintaining custom Fiori (Z) roles, structuring access through Spaces, Pages, Catalogs, and Groups.
- Troubleshooting and resolving complex Fiori authorization issues to ensure smooth end-user adoption.
- Providing dedicated support during System Integration Testing (SIT) and User Acceptance Testing (UAT), conducting advanced troubleshooting, trace analysis (STAUTHTRACE/ST01), and dump analysis (ST22/SU53).
- Managing security updates and providing validation support across SAP CRM, SAP CCS, and SAP BW landscapes.

TRAINING

Professional English Immersion & Development (In Progress)

Actively advancing English proficiency through intensive, weekly sessions with native speakers from the United States. Focused on achieving high-level conversational fluency, deep listening comprehension, and precise contextual communication to ensure seamless integration into North American corporate environments and global SAP projects.

SAP GRC Access Control 12.0 (Implementation and Configuration)

SAP GRC Access Control 12.0 focused on Implementation and Configuration provided by GPLux SAP Training.

SAP FIORI (Authorization Concepts and Profiles in S/4Hana)

Focused on Authorization Concepts and Profiles in S/4Hana provided by GPLux SAP Training.

Academy Basis S/4Hana and Business Suite

Delivered by GPLux SAP Training, covering foundations of S/4Hana and Business Suite.

SAP HANA Foundations - 16 hours

Foundation course for SAP HANA spanning 16 hours, offered by TRAINNING Education Center.

SAP BASIS Academy - 32 hours

A comprehensive 32-hour course on SAP BASIS, offered by TRAINNING Education Center.

SAP ABAP Academy - 32 hours

SAP ABAP skills training, 32 hours, provided by TRAINNING Education Center.

Functional R/3 Foundations - FI, CO, MM, PP, and SD - 32 hours

Functional foundations course covering FI, CO, MM, PP, and SD, 32 hours, by TRAINNING Education Center.

ITIL 4 ® Foundation - 16 hours

ITIL 4 Foundation course offered by TRAINNING Education Center, spanning 16 hours.

EXPERIENCE

Senior SAP Security Consultant

01/2023 - 04/2025

AB InBev

São Paulo, Brazil (Remote)

Global S/4HANA Rollout & Hypercare: Provided specialized post-GoLive support and ongoing application maintenance (AMS) during a multi-phase global migration. Focused on stabilizing access and security for various business units and plants as they transitioned from legacy ECC to the S/4HANA global template.

Consulting: VERUS

- Managed access controls across a complex landscape, including S/4HANA, HANA DB, Fiori, TM, PI/PO, MDG, CFIN, and BW.
- Handled end-to-end user administration via SAP GRC, including unlocks, organizational role changes, and access adjustments driven by business process evolutions.
- Resolved incidents and service requests via ServiceNow, performing detailed log analysis and role identification to remediate authorization errors.
- Controlled system environment status via SCC4, managing the opening and closing of clients for authorized changes and planned maintenance windows.
- Configured SAP remote connections and managed user provisioning within the SAP Portal.
- Administered specialized access assignments and security governance specifically for HANA DB.
- Delivered high-touch Hypercare support for newly migrated plants, ensuring operational stability for a high volume of users transitioning from legacy environments.

Senior Technology Access Management Analyst (SAP Security)

03/2020 - 11/2023

BRF

Curitiba, Brazil (Remote)

End-to-End AMS & Global Support: Delivered comprehensive Application Management Services (AMS) for SAP Security, focusing on operational stability and continuous system improvement. Acted as a key technical resource by fulfilling enterprise-wide demands via ServiceNow, supporting global internal initiatives (such as the Turkey operations), and providing strict technical support for compliance and audit processes.

- Provided continuous SAP Security support and system stabilization within complex ECC environments.
- Managed the end-to-end user lifecycle (SU01/SU10), including account provisioning, unlocks, password resets, and secure access terminations.
- Resolved incidents and service requests via ServiceNow, conducting advanced log troubleshooting (SU53, ST01, STAUTHTRACE) to identify and remediate missing authorizations.
- Maintained, supported, and restructured technical roles (PFCG), effectively managing derived roles, transaction catalogs, and authorization objects.
- Administered critical profiles and Segregation of Duties (SoD), enforcing mitigating controls and least privilege access policies.
- Analyzed and promoted roles across system landscapes (DEV/QAS/PRD), providing rigorous technical oversight for transport requests.
- Supported SOX compliance and external audits by generating required access reports, extracting technical evidence, and executing requested role adjustments.
- Ensured continuous system compliance by closely administering the access lifecycle in alignment with corporate governance standards.
- Executed advanced queries and generated detailed reports via SUIM, SE16N, and ST03N to proactively monitor access logs and track critical activities.

TRAINING

ISO 27001 Foundations - 16 hours

Foundational training in ISO 27001, 16 hours, by TRAINNING Education Center.

EXPERIENCE

Mid-level SAP Security Consultant

06/2021 - 11/2022

Construtora Tenda

São Paulo, Brazil (Remote)

Post-Implementation Support & Stabilization: Provided specialized technical support during the critical hypercare and guarantee phases following a large-scale role restructuring project. Focused on stabilizing the new security architecture, ensuring seamless user transitions, and maintaining operational continuity through efficient AMS delivery.

Consulting: VERUS

- Handled support requests related to SAP ECC access (SU01, SU53, STAUTHTRACE).
- Delivered dedicated post-go-live support to ensure the stability and effectiveness of the newly implemented authorization model.
- Managed and resolved security-related incidents and service requests through the internal ticketing system, focusing on rapid response and functional error remediation.
- Performed comprehensive access risk analysis utilizing a Microsoft Access-based risk matrix, ensuring alignment with organizational security policies in a non-GRC environment.
- Adjusted and refined technical roles and authorization profiles based on operational feedback and post-migration requirements.
- Maintained the user lifecycle and governed access rights within the revamped SAP security framework to ensure ongoing compliance.

Junior SAP Security Consultant

04/2019 - 01/2020

Embrapa (Government Project)

Brasilia - DF / On-site

Greenfield SAP Implementation: Actively participated in the end-to-end SAP implementation for a major government agency. Gained deep technical foundations by assisting in the design and construction of the entire security landscape from scratch. Collaborated closely with lead consultants to translate business blueprints into robust authorization models, ensuring a secure and scalable environment from Day 1.

Consulting: CAST Group

Project Conecta

- Supported the full lifecycle of role administration, including the creation, modification, and maintenance of technical roles (PFCG) based on Solution Manager (SolMan) blueprints.
- Developed and delivered comprehensive end-user training materials, Standard Operating Procedures (SOPs), and step-by-step guides using SAP Enable Now, significantly accelerating user adoption post-go-live.
- Assisted in the implementation of SAP Fiori security, creating catalogs and groups, and conducting extensive functional testing to ensure seamless user access.
- Executed detailed access mapping using trace tools (ST01/STAUTHTRACE) to build precise authorization profiles and remediate gaps during the build phase.
- Collaborated on the setup and maintenance of Organizational Structures and Structural Profiles (PPOMA/PPOME), ensuring correct access inheritance and HCM integration.
- Managed user provisioning and administration across multiple environments, ensuring alignment with project timelines and security standards.
- Provided dedicated support to functional consultants and end-users during testing phases, troubleshooting complex authorization errors to ensure project milestones were met.

EXPERIENCE

Junior SAP Security Analyst

10/2012 - 09/2017

SONDA (formerly CTIS)

Brasilia - DF / On-site

SAP Security Operations & Compliance: Maintained continuous SAP Security operations, user governance, and compliance during the corporate acquisition of CTIS by SONDA. Responsible for routine access administration, risk analysis, and supporting SOX compliance requirements within a highly regulated environment.

- Administered user provisioning and access approvals utilizing SAP GRC Access Control (GRC-AC) and SAP ChaRM.
- Managed the end-to-end lifecycle of technical roles (PFCG), precisely configuring critical permissions, transactions, and authorization objects.
- Executed comprehensive access risk analyses utilizing the GRC Access Risk Matrix (GRC-AM), identifying SoD conflicts and critical actions across users and roles.
- Developed and implemented mitigating controls to remediate identified security vulnerabilities and ensure strict adherence to internal policies.
- Generated detailed compliance and risk assessment reports to support SOX auditing processes.
- Configured continuous access monitoring alerts and conducted proactive simulations to support risk owners.
- Participated in a major access restructuring project and SAP GRC implementation (AC, ARA, EAM), building and testing new technical roles aligned with business requirements.
